

CARD MANAGEMENT SYSTEM AND METHOD THEREFORE

ABSTRACT

The invention is a method and system for on-line card management, wherein the card is issued to a card user 39 by an issuing organization 46. The card user 39 interfaces with a card management organization 44 via the card user's own computer 40 through the Internet system 38 to a computer system 42 within the management organization 44. The computer system 42 includes a computer program 44 that processes the request concerning the card(s) and the card issuer 46 is informed of the card user's 39 request via the Internet system 38. The computer program thereafter informs the card user 39 that the card issuer 46 has been informed.
